Thank you:

Sorry to be a bother. Just trying to be as consistent with previous posts as possible.

So another question:

For the August 6th data and the August 12th data, do either of the following statements apply (other than the dates):

1) Today, EPA has released additional water quality data from Aug. 7 to Aug. 10, 2015 for the Animas and San Juan Rivers from the Northern Border of New Mexico to Navajo Nation

2) Today, EPA has released additional water quality data from Aug. 7 to Aug. 11, 2015, on the San Juan River between Farmington and Shiprock, New Mexico

Matt and Kathie:

For the august 6th data set, is there is there an expanded one-line statement we can say about the location of the August 6th data. For example the August 12th data set, the messaging had a first line statement of: "Ten surface water samples were collected at nine (9) locations south of Colorado along the Animas River and the San Juan River of New Mexico on August 12th, 2015".

Can we use this same statement but just replace the number of samples and the date?

Terry

Subject: Region 6 Animas/San Juan River Water Sampling data for August 6th

Please find attached the data for the two samples taken by R8 for Region 6 on August 6th, pre-slug.
